

EUROPEAN DESTRUCTIVE TESTING TECHNICIAN

Project number 2020-1-PL01-KA202-081820

Changing lives. Opening minds.
ERASMUS +

TRUST WILL CREATE

- The European Destructive Testing Technician qualification (EQF level 4), addressing Destructive Testing of welded joints, aligned with Industrial needs and Standards requirements, that will rapidly improve the quality of Vocational Education System at EU level;
- A Recognition of Prior Learning (RPL) process that will allow professionals already working on Destructive Testing, but do not have the needed qualification, the opportunity to upskill;
- A Qualification Guideline with information on access conditions to this new qualification and learning pathways in line with the lifelong learning approach;
- A Handbook comprising the innovative pedagogical methodologies, practical exercises and assessment tools developed for an harmonised implementation of the European Destructive Testing Technician qualification.

TRUST WILL

- Increase transparency of competences and qualifications for the Manufacturing Sector;
- Enhance integration of training offer in countries with lower engagement or lower access to it;
- Foster new learning opportunities in an easily accessible and career-oriented VET profile that will make VET more responsive to the sector's challenges;
- Promote linguistic diversity by providing a multinational glossary and pilot training.

TRUST TARGET GROUPS

- Young trainees involved in Initial Vocational Education and Training (I-VET);
- Trainees with working experience;
- Professionals already working in Destructive Testing who lack the required qualification or need to upskill through Continuing Vocational Education and Training (C-VET);
- Teachers/trainers;
- European VET experts & Industry representatives;
- National Qualification Agencies.
